General information

name of the dataset:

full name of the dataset: *Flemish sport fisheries data*

type of dataset ([more information](#)): *species distribution data*

data type: *point data/observation data*

short description of the dataset/summary:

Fish data collected during fishing contests in Flanders collected by the "Vlaamse Vereniging van Hengelsport Verbonden V.V.H.V. vzw" (Translated: Flemish Organization of Angling Associations). Data include catch frequency at species level, length frequency by fish groups and details about the total catches on the contests (total hours and effort spent, weight of total catch,...).
